Key Features

- Rotator + Quick coupler (Quick hitch, pin grabber)
- 360 degree endless rotation for both direction.
- Works with harsh attachments such as hydraulic breaker, ripper, crusher, fork.
- Works with the excavator hydraulic system for any rotational attachment.
- HARDOX AR plate is used.
- Continuously upgraded and fully verified.
- More than 3000 units have been delivered.

Benefits of a robust rotating quick coupler

- You can reduce operation time significantly and save your money remarkably.
- You can still use all your current attachments such as grapple, hydraulic breaker, thumb, shear, crusher, ripper, vibro-ripper...
- No need to buy an extra bucket which is usually needed for a tilt rotator.
- Much less expensive than a tilt rotator.

Applicable Areas

- Urban building construction (especially a site where it go with Cast In Place method)
- Road construction and repairing
- Any work to be capable having non-rotatable attachments
- Backhoe version are also available.
- one year warranty
