

WOOD SAW Attachment

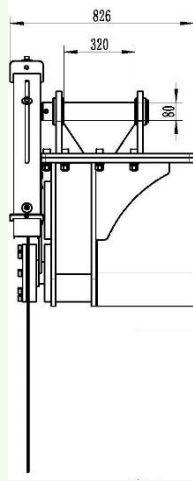

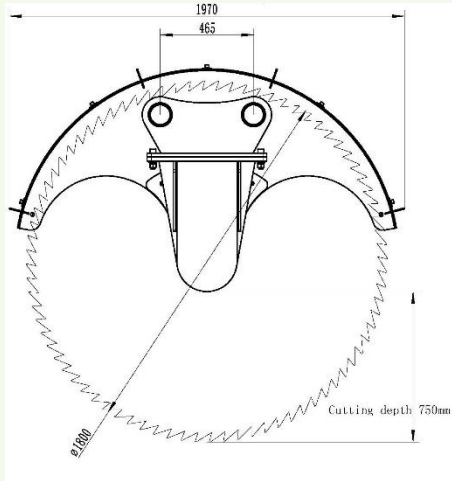

Fast-cutting of logs, tree stumps, plywood...

- Welded Tungsten carbide saw can cut any type of wood with the massive hydraulic power from the excavator.
- The number and shape of tips are optimized to cut wood.
- The tip speed is optimized (higher speed than rock saw) to cut wood.
- Huge logs can be cut without the limitation of machine space.
- Best design to cut huge volume of logs in high speed.
- No additional power pack is needed.

WOOD SAW

Attachment

Model	WS-10S	WS-20S
Max. Power(Kw)	75	135
Max. Flow(Lpm)	250	350
Recommended Flow(Lpm)	100-200	200-300
Max. Pressure(Bar)	315	315
Speed(Rpm)	1100@250lpm	980@300lpm
Torque(N.M)	1000@315bar	1540@315bar
Blade Diameter(mm)	1400	1800
Cutting Depth(mm)	550	750
Weight(Kg)	700	950
Excavator(Ton)	8-20	20-45
